

## Technical Qualifications

- **Languages:** Javascript, Python, Java, C++, Scala, C#, Bash, SQL
- **Technologies:** React, AngularJS, Play Framework, Flask, Node.js, Hadoop, Amazon Web Services
- **Tools:** Git, SVN, Vim, Eclipse, Visual Studio, Android Studio, IntelliJ IDEA, Docker, Ansible

## Work Experience

[Riot Games](#) – Los Angeles, California

May 2016 – June 2016

### Software Engineering Intern – Insights Tech

- Maintained a real-time events pipeline that indexes millions of messages per minute.
- Helped create a high-performance, containerized service to serve as the point of entry for the pipeline. It was deployed globally and handles thousands of requests per second.
- Designed and implemented a holistic monitoring tool for Kafka, Logstash and Elasticsearch, visualizing the performance and stability of hundreds of servers and containers.

[Google](#) – Kitchener, Ontario

August 2015 – December 2015

### Software Engineering Intern – Display Ads Infrastructure

- Maintained a critical C++ Display Ads binary, a service that coordinates the ad serving system for AdSense and DoubleClick. It handles billions of requests per day.
- Improved release processes; designed and implemented a Python tool to detect configuration changes between redeployments, and consolidated over 20 automated release tasks.
- Designed and implemented a strategy for sending RPCs between two Display Ads services, aimed at improving latency and code reusability.
- Migrated two critical code paths from a state-machine based design to a patented [Producer Graph](#) design, enabling faster development.

[Coursera](#) – Mountain View, California

January 2015 – May 2015

### Data Infrastructure Engineer

- Built the frontend for Coursera's A/B testing platform in React, including experiment management tools and an analytics dashboard; scaling it up from 20 to 250 A/B experiments in 3 months.
- Developed and maintained back-end services in Scala; such as adding by-URL allocated A/B experiments and modifying Coursera's second-most popular API endpoint.
- Co-authored [Dataduct](#), Coursera's open-source ETL library for Amazon Data Pipeline and Redshift, which manages all of Coursera's 110+ ETLs and 360+ tables for its data warehouse.

[Desire2Learn](#) – Kitchener, Ontario

April 2014 – August 2014

### Software Developer

- Implemented and maintained new and existing features for the learning management system Brightspace.
- Collaborated with teammates to resolve over 40 performance, usability, and security issues.
- Extended RESTful APIs and native applications to help a client manage 30000+ metadata entries.

## Projects

### 2048 Android App ([ls.tpcstld.me/L8pssaNZo](https://github.com/tpcstld/2048-Android))

- A port of the 2048 puzzle game to Android
- Earned 400 000+ downloads, 4.4 stars with 5000+ reviews on Google Play

### Youtube Downloader ([youtube.tpcstld.me](https://github.com/tpcstld/youtube-downloader))

- A website that downloads YouTube videos in mp3 or mp4 format
- Tools: Python, FFmpeg, Foundation, Heroku

## Education

### **Candidate for Software Engineering**

University of Waterloo, Waterloo, Ontario

Sept 2013 – Present

- Achieved a 93.36% cumulative average.
